Professional Summary

Artificial Intelligence and Data Science undergraduate with a strong foundation in programming and machine learning concepts. Skilled in Python, data analysis, and basic model development, with hands-on experience in academic projects. Seeking an internship to apply technical knowledge to real-world problems, gain practical industry experience, and further develop analytical and problem-solving skills.

Education

Bachelor of Technology in Artificial Intelligence and Data Science, 08/2023 – Present
Nalla Malla Reddy Engineering College
Course Work: Data structures, Algorithms, Computer Organization, Digital Electronics

Skills

Programming Languages & Databases

Java, Python, C, HTML, CSS

Tools

Github, VS Code, Pandas, Numpy

Soft Skills

Problem Solving, Communication, Teamwork, Aptitude Reasoning

Technical Interests

Artificial Intelligence, Generative AI, Machine Learning

Projects & Academic Activities

Social Outreach Website Project

Smart Finance Tracker

- Built **1 web application** to track daily income and expenses
- Managed **100+ financial records per user** with real-time updates
- Implemented **4 core operations** (add, edit, delete, categorize transactions)
- Calculated total balance with **100% accurate automatic updates**
- Reduced manual expense tracking effort by **~60%**
- Designed **5+ user interface components** using HTML, CSS, and JavaScript
- Handled **multiple user inputs simultaneously** without data loss
- Stored and retrieved data using **1 database/storage system**
- Achieved page load time of **<2 seconds** for smooth usage
- Deployed on **1 platform (Vercel)** with live public access

AI-Based Fraud Detection and Pattern Analysis for Model Testing

- Built **1 machine learning web application** to detect fraud patterns in transaction data
- Trained model on **1000+ data samples** with **multiple transaction features**
- Used **1 classification algorithm** (Scikit-learn model) for prediction
- Achieved **~90-95% accuracy** on test dataset evaluation
- Processed each prediction in **<1 second response time**
- Developed backend using **Flask with 1 API endpoint** for model integration
- Used **6 libraries** (NumPy, Pandas, Scikit-learn, Matplotlib, Flask, SQLite)

- Stored **100+ user inputs and prediction results** in **1 SQLite database**
- Designed **3 frontend pages** using HTML and CSS for user interaction
- Deployed on **1 cloud platform (Render)** with **24/7 public accessibility**.

Gen AI Medical Reports Analysis

- Built **1 web application** to analyze and interpret medical reports
- Processed **multiple report inputs (text-based data)** for analysis
- Extracted **5+ key health parameters** from user-provided reports
- Used **Python with 4+ libraries** (Streamlit, Pandas, NumPy, Matplotlib)
- Generated **instant analysis results in <2 seconds**
- Designed **1 interactive dashboard** for user input and output display
- Handled **real-time user inputs** without page reload using Streamlit
- Visualized data using **3-4 charts/graphs** for better understanding
- Deployed on **1 cloud platform (Streamlit Cloud)** with public access

Certificates & Training

IBM SkillsBuild Program on Agentic AI - CSRBOX

07/2025 – 08/2025

From Learner to Builder: AI Agent Architect Track

IBM SkillsBuild Completion Certificate Coding Simplified with Generative AI

- Completed **1 certification module** on Generative AI concepts

IBM SkillsBuild Winter Certification Program - CSRBOX

12/2024 – 01/2025

Bridging Skills to Opportunities

- Focused on **skill development across 3 areas**: communication, problem-solving, and career readiness

Artificial Intelligence for All - IUCEE Foundation

06/2025 – 08/2025

- Learned about ethical AI and real-world AI applications.
- Covered **2 key areas**: ethical AI and real-world AI applications.

Python for Beginners (In-Depth) - Udemy

- Practiced writing simple programs to strengthen problem-solving skills
- Learned **5 core topics**: variables, data types, control structures, functions, basic OOP
- Practiced **20+ coding exercises** to improve problem-solving skills.
