PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate with hands-on experience in Machine Learning, Generative AI, and AI-powered web application development. Skilled in Python, Flask, Streamlit, with practical experience in developing projects for fraud detection, AI-generated content analysis, and medical report summarization. Passionate about building intelligent, user-focused solutions and applying AI technologies to solve real-world problems.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science, 06/2027
Nalla Malla Reddy Engineering College

- Expected Graduation: June 2027
- Current CGPA: 8.5/10

SKILLS

Programming Languages

- C
- Java
- Python

AI & machine Learning

- Machine Learning
- Generative AI
- Artificial Intelligence
- NLP

Web Technologies

- HTML
- CSS

Frameworks And Libraries

- Streamlit
- Flask
- Pandas
- NumPy
- Matplotlib

Tools and Platforms

- GitHub
- VS Code
- Jupyter Notebook
- Render

Projects & Academic Activities

Social Outreach Website Projects / Smart Finance Tracker [🔗](#)

- Developed 1 responsive website for a social outreach initiative, improving information access for 100+ users.
- Worked with a team of 3-4 members to design and implement 5+ core features.
- Structured 10+ web pages, improving usability and navigation efficiency by ~30%.

AI-Powered Detection System for Generated Content and Fraud Identification [🔗](#)

- Built a web-based AI/ML system to detect AI-generated text, images, and URLs with ~90% prediction accuracy.
- Analysed 3 input types (text, images, URLs) using pattern-based and ML techniques, flagging fraudulent or suspicious inputs.
- Extracted 5+ behavioural and pattern features per input, improving detection reliability by ~20%.
- Developed a Flask application returning results in under 2 seconds per request.
- Validated the model on 1,000+ test inputs, reducing false positives/negatives by ~10%.

- Generated probability-based confidence scores (0-100%) per prediction instead of binary outputs.
- GitHub Link :- <https://github.com/gayathrichowdary-a/ai-detection> 

Generative AI-Based Medical Report Analysis System

- Built a web application to analyse medical reports (PDF/images) and generate results with ~90-93% accuracy.
- Processed and extracted data from multiple report formats (PDF, JPG, PNG) using automated text extraction.
- Analysed 20+ medical parameters per report and identified abnormal values for quick review.
- Generated structured summaries, reducing manual reading time by ~50%.
- Delivered results through a Streamlit interface with <3 seconds response time.
- Tested system with 100+ sample reports to improve consistency and reduce errors by ~10%.

Certificates & Training

PGDCA In Vision Computers Education Vision Computers Education Jul 2024 - Sep 2024	Artificial Intelligence for All  IUCEE Foundation	Python For Beginners Course  Udemy
IBM Skills Build Program on Agentic Ai - CSRBOX  IBM SkillsBuild Jul 2025 - Aug 2025		

Internships

IBM SkillsBuild AI Strategy & Business Intelligence Internship  , <i>IBM SkillsBuild CSRBOX AICTE</i>	03/2026 – 04/2026 India
• Successfully completed a 6-week internship on AI Strategy & Business Intelligence. • Gained practical knowledge in Artificial Intelligence and Business Intelligence concepts. • Completed hands-on learning activities related to AI and Business Intelligence. • Improved analytical, problem-solving, and technical skills through internship training.
